Education

Bournemouth University

BSc, (Hons) Games Design

STRODE College

IT Practitioners L3

Achievements

- Concepting and Writing AAA pitches to international clients
- Responsible for onboarding Juniors/ Interns
- Personally commended by the Design Director for my cross-disciplinary communication skills.

About

Hello, I'm Oli!

I am a UK-based Games Designer with 4 years of AAA industry experience.

Creating memorable, interactive and fun worlds is what drives my passion for games design. Combining technical and logistical problem-solving, with creative and engaging storytelling ensures that I am able to craft rich and immersive experiences that players will love and truly get lost in.

Skills

3D Tools: Maya, Blender

Games Engines: Unreal Engine 5, Unity

Workflow: G-Workspace / Office 365, Jira / Confluence, Perforce

Editing: Premiere Pro, Davinci Resolve, Photoshop

IDE's: Visual Studio/Code, Rider

Design: Whiteboxing, Prototyping, Quest Scripting, Mission Design

Programming Languages: Blueprints, C#, C++

Projects

EXODUS™

Feb 2023 - Present

Climax Studios | Archetype Entertainment
Level/Quest Designer

- Worked with Archetype Entertainment on EXODUS, an epic sci-fi RPG.
- Responsible for the creation of several key interactable gameplay objects and systems. Taking them from prototype to completion working closely with all disciplines to deliver a AAA experience.
- Took ownership over many areas and levels. Whiteboxing rooms/combat encounters, scripting level logic and working closely with other disciplines to ensure design intent remains intact.

Excited to share alot more about this project in the future!

RETURNAL™

Feb 2022 - Jan 2023

Climax Studios | Housemarque
QA Technician

- Worked with Housemarque on Returnal, a sci-fi Rogelike.

My time as a QA Technician deeply refined my understanding of the game development pipeline. Through extensive cross-platform testing, debugging, and how game mechanics can be broken. This directly informs my design process.

I leverage that knowledge to design proactively. Anticipating technical constraints and breakable edge cases to create robust, 'QA-proof' designs.

Professional Experience

Level Designer

Climax Studios / Full Time

Feb 2023 - Present

- A strong level flow, metrics & pacing
- Experience working within Unreal Engine
- Industry Standard Visual Scripting
- Rapid Prototyping Gameplay Mechanics
- Grey Boxing levels to a professional standard.
- Clean Blockouts featuring strong visual signposting & and composition
- Communication skills to collaborate with a creative & multidisciplinary team.

QA Technician

Climax Studios / Contract

Feb 2022 - Jan 2023

- Industry standard JIRA & TestRails
- Regression and general testing across a range of platforms.
- Running and testing multiplayer features and test plans.
- Bug reporting workflow & updating bug databases.
- Understanding of games, development cycle, key milestones and game terminology
